AS-960

THE ADDRESSING SOLUTION THAT HAS IT ALL

A High-Performance Addressing, Barcoding and Graphics Solution

WE VALUE YOUR MAIL

AS-960

SAVE MONEY AND INCREASE RESPONSE RATES

It's the high-speed, heavy-duty professional desktop address and barcode printer built with HP Inkjet Technology. The AS-960 allows your organization to print crisp, professional messages which get noticed and opened, including addresses, return addresses, the latest USPS barcodes, such as the Intelligent Mail® barcode, and personalized messages. You can even include your company logo - all in one pass. This powerhouse moves with speeds of up to 26,000 envelopes per hour.

EASE OF USE

All of the mailing preparation tasks are controlled by Neopost's address quality management software, eliminating the cumbersome and time consuming operation that operators are faced with. The easy-to-use graphical user interface simplifies the rapid design of the envelope layout. Additionally the software provides automatic address validation and correction, identifies and eliminates duplicates sent to the same address and automatically pre-sorts mail before printing to minimize mail preparation time.

IMAGE IS EVERYTHING

Our patented HP printing technology produces true 600x600 dots per inch printed images. This means sharp, crisp, more easily readable addresses and professional appearance. With the AS-960, you get a clear, consistent, machine-readable barcode that allows your document to fly through the Postal Service reading systems, increasing your productivity. It even lowers your printing costs.

ADDRESSING

Print custom attention-grabbing messages using any TrueType font.

SHIPPING DISCOUNTS

Neopost CASS™-compliant address quality management software certifies your mail for USPS discounts and reduces your rate of returns.

FLEXIBILITY

Add a conveyor/stacker and dryer to run larger print jobs with ease.

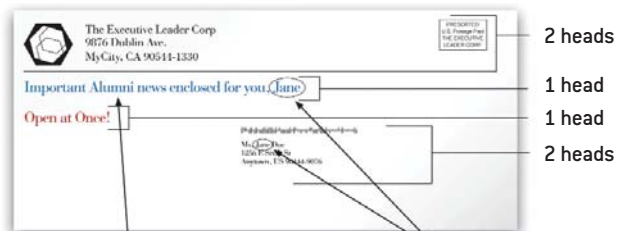

Print on items up to 3/8" thick or as large as 15" x 20".

APPLICATION VERSATILITY

The AS-960 supports documents up to 3/8" thick, and with the robust integrated feeder provides the greatest flexibility in mailing applications, supporting envelopes, postcards, newspapers, brochures, newsletters, calendars, booklets and catalogs.

Spot color increases the impact of your mail piece

Personalize variable message
